

Ramon FOLCH

(Barcelona, 1946)

Graduate (1968) and PhD (1976) in Biological Sciences, University of Barcelona

PhD in Biology, sociologist. After several years of academic activity as Professor of Botany at the University of Barcelona, (1968-75), he became director (1975-82) of the Environmental Services of Barcelona Regional Council and the Autonomous Government of Catalonia; later, he directed his activity towards international technical cooperation, the social aspects of ecological issues and environmental scientific communication. In this respect, he has made many contributions to the construction of socio-ecological and sustainable thinking, which is reflected in his bibliography, and to the approach of interests and positions between ecology and the conventional socio-economic sectors. As an environmental consultant, university professor or independent professional, he has carried out activities in a large number of countries, mainly in the Mediterranean, African, American and Southeast Asian countries.

For many years he has been a consultant in Environmental Management to UNESCO and member of the UNESCO monitoring committee of the Rio Conference (Paris). He represented Spain on the European Commission's Directorate-General for Research Commission on Organisms of Biology and Systems (Brussels) at the time when Spain became a member of the European Union (then [1986] The European Community). Since 1989 he has been linked to the Latin-American Forum of Environmental Sciences (La Plata, Argentina), of which he is general secretary of the International Advisory Council and Professor of the UNESCO Chair for Sustainable Development. Since 1994 he has been the director of his own professional office (ERF - Gestió i Comunicació Ambiental, SL), an environmental projects consultancy and workshop, engaged, particularly, in the fields of territorial communication and management, as well as to project research and scientific publishing.

He is author of an extensive bibliographic and audio-visual body of work that includes around twenty titles (as the sole author or director of a team), more than two hundred articles, various exhibitions and two television series. Among the works directed we should highlight the *White Paper on the Management of Nature in the Catalan lands* (1976), *The Natural History of the Catalan Lands* (1983-92, 16 volumes) and *Biosphere* (1992-98, 11 volumes) and, among those of which he is the individual author, the socio-ecological trilogy *On Ecologism and Applied Ecology* (1970), *On Ecology, Education and Development* (1990) and *On Environmental Education and Socio-ecology* (1993), as well as *The Environment, Emotion and Ethics* (1998), *Dictionary of Socio-ecology* (1999) and *The Mania for Looking* (2000). He directed the 50 part television series *Mediterranean* (1987-89) and the multi-media exhibitions *Beloved Earth* (1992) and *Two Million Centuries* (1998).

Educational activities

He has carried out his teaching activities and directed degree or doctoral theses in various universities and higher education centres, mainly at the University of Barcelona and the Latin American Forum of Environmental Sciences (FLACAM) - UNESCO Chair for Sustainable Development, which covers around thirty university, professional and research centres in Argentina, Bolivia, Brazil, Columbia, Cuba, Italy, Mexico, Paraguay, Peru, Uruguay, Venezuela and Chile.

Institutional activities

He has held many institutional responsibilities, especially as a member of various UNESCO committees or programmes, including the MAB (Man and Biosphere, 1985-94) programme, an international system of research and reflection which has contributed powerfully to the emergence of modern socio-environmental ideas. He has held organisational responsibility in numerous environmental conferences or campaigns, including the Inter-Municipal Conference against the Pollution of the Mediterranean (1980-81).

Together with Prof. Jaume Terrades, he conceived and laid down the functional groundwork of the Centre for Ecological Research and Forestry Applications (CREAF), and he has been a member of its Board of Directors for more than a decade. He played an important role in the reorganisation of the Catalan Institute of Natural History, the highest-standing institutional body among Catalan environmental organisations (founded in 1899).

Scientific and socio-environmental communication

He has carried out an intense and varied activity as a scientific communicator, both in the epistemological and training fields, and in the conception and realisation of specific projects for the media (publications, exhibitions, the press and audio-visual media). Since the beginning of the eighties he has been present in the opinion sections of several newspapers and magazines, particularly in *La Vanguardia*, with analysis and reflection on socio-environmental and sustainability issues.

In the field of publishing, aside from his own production as an individual author or director of studies or reports which have been turned into books (see bibliography), he has also edited numerous collectively written works, among which the following are especially notable *Nature, Use or Abuse? White paper on the management of nature in the Catalan lands* (1976 [2nd edition 1989], by around a hundred authors, considered the fundamental work of Catalan environmental thinking and without doubt a pioneering work in Spain and southern Europe), *A Natural History of the Catalan Lands* (1983-92, almost three hundred authors, 16 volumes) and *Biosphere* (1992-98, two-hundred authors from around the world, 11 volumes, with an American version, *Encyclopedia of the Biosphere* [2000]). He created and initially edited (1976-83) the *Applied Ecology Notebooks* and is scientific editor of two socio-environmental magazines, *El Temps Ambiental* and *Sostenible*.

He has created, written or directed programmes for radio and television, amongst the most outstanding of which is the 50 part series *Mediterranean* (1986-89). This was a series on Mediterranean people and eco-systems throughout the yearly seasonal cycle, filmed in various countries in the Mediterranean basin (Spain, France, Italy, Malta, Albania, Greece, Turkey, Morocco), California, central Chile and Southern Australia. He has also taken on the creation and curatorship of numerous multi-media exhibitions, including *Beloved Earth*, devoted to the socio-environmental characteristics and problems of the different biomes of the world (Barcelona'92 Cultural OLYMPIAD, also exhibited in Madrid, Bilbao and Aveiro), and "Two Million Centures" (Lisbon Expo'98), on the dinosaurs discovered in Argentine (Patagonia).
