Campaign: "At Sant Boi, we are efficient!"

Guide to save energy and water in households

Category:

[Estratègies de ciutat sostenible i acció climàtica](#) [1]

Client

Sant Boi de Llobregat City Council

Location

Sant Boi

Period

2018

Motivation

In Sant Boi de Llobregat, they are concerned about energy efficiency and sustainability. Through energy consumption monitoring of consumption and energy saving actions in buildings, municipal services and public lighting, there has been a saving of 3,450 t of CO₂ eq. and 1 M€.

Results

To better use energy in the municipality, the City Council has decided to reedit and update the guide: "At Sant Boi, we are efficient. Guide to save energy and water in households", which contains simple

tips to understand and reduce the electricity bill and save on different issues such as contracted power, household appliances, lighting, hot water, cooking ...
