## Everyone can save energy and money and have fun through ECOPlay!

07/12/2020

Over the next few weeks, participants will be able to save energy by playing and competing for prizes

Through the ECOPlay app, now available for [Android](#) [1] and [iOS](#) [2], over the coming weeks, participants will have access to two mini-series and interactive games to learn how to reduce their ecological footprint at home and, at the same time, save on the energy bill. To pass from one level to the next everyone will need to answer a quick test. Being attentive and having good energy habits will allow to earn points and qualify to win an attractive prize.

The project is part of Horizon 2020 of the European Union and has been developed in partnership between: Spain, Portugal, Germany, the Netherlands, Switzerland, Denmark and Great Britain.

ERF coordinates one of the pilots of the project, with the collaboration of the City Council of El Prat de Llobregat.
