ERF joins the Climate Action Commitments of the Catalan government

21/05/2021

Among the objectives set by ERF, there is the development of a plan to achieve carbon neutrality by 2050 and a calendar to reduce Greenhouse Gases emissions

ERF has committed to achieving 26 of the [Climate Action goals](#) [1] of the Generalitat of Catalonia, that aim to take a step forward towards carbon neutrality. These sustainability commitments were defined at the 1st Catalan Climate Action Summit, which was held in January 2020 and which had the support of ERF in the organization and dynamization.

In a scenario characterized by the approval of the [Law on climate change](#) [2] in 2017 and the Declaration of the Climate Emergency in 2019, more than 115 entities have already joined the Climate Action program. Among the measures ERF has committed to, there is the development of a plan to achieve carbon neutrality and an emissions reduction calendar, as well as participation in R&D projects seeking to reduce the environmental impact of buildings, as a company in the urban planning, architecture and construction sector.

Among the commitments, there is also adherence to the Generalitat's [Voluntary Agreements Program](#) [3], which ERF has maintained since 2010. Within the framework of this program, the company has quantified a 71% reduction in consumption between 2011 and 2019, thanks to measures such as the contract of 100% renewable electricity or the use of electric vehicles for business trips.
